Learn how to take images shot in "RAW" and process them using the Adobe RAW Converter within Elements. Also covered is how to process JPEG images using the RAW Processor. This is a hands-on class for both PC's and MAC computers. You will learn when and why to consider shooting in RAW and, when and why to shoot in JPEG. A detailed step-by-step handout, with actual screen shots, is provided. Completion of "Introduction to Elements Part 1 and Part 2" or equivalent knowledge is mandatory.
